https://github.com/brianc24

I am a Full Stack Developer with the passion for learning and creating web applications. I enjoy working with a team as much as working alone. I constantly work on projects to sharpen my skills, and gain a better understanding in the technologies used. I am a hard worker and enjoy solving problems using different approaches.

Technologies Known: HTML5, CSS3, Bootstrap, JavaScript, AngularJS, .NET, C#, jQuery, Mongo, SQL Servers, SCRUM, Restful API's.

Experience:

R.M.F Photography
Front End Developer
2017-Present

Link: https://brianc24.github.io/FrancoPhotography
I created a website for Ryan Franco Photography to display his art as a photographer. His homepage showcases his work. You can view the rest of his work in his gallery through different tabs. I did the design to emulate his work and represented it in a simplistic yet modern fashion.

Technologies used: HTML5, CSS3, Bootstrap, AngularJS.

Redwood Code Academy
Full Stack Developer
2017-Present

Projects:
- CodeCollective: https://github.com/BrianC24/CodeCollective
  CodeCollective is a website designed to integrate fun and professionalism within the Redwood Code community.
  Technologies: HTML5, CSS, Bootstrap, AngularJS, JSON, Restful API's

- FlagRush: https://github.com/BrianC24/FlagRush
  FlagRush is an online board game designed to test strategy.
  Technologies: HTML5, CSS, Bootstrap, jQuery, AngularJS, .NET, C#, SQL Server

Books En More
Assistant It Coordinator
2016-2017

As the assistant coordinator, I helped with the tracking and organizing of shipment schedules.
I uploaded new materials to the website using Magento as well as update the company's social media.
I Helped create campaigns and flyers to promote specials and events.
